Husqvarna WT 15

A compact and easy-to-use 4 gallon water tank that helps you work efficiently. It has an electric pump, so there's no manual pumping required. The WT 15 is battery-powered with an 18.5 V Gardena Li-Ion accumulator system.

POWERFUL LITHIUM-ION BATTERY AND CHARGER

Husqvarna WT 15 comes equipped with a Lithium-Ion battery, charger and a Gardena spray nozzle, conveniently placed in a compartment on the WT 15. A fully charged battery will give a continous running time of 45 minutes.

AUTOSTOP FUNCTION

The advanced water tank has an autostop function that safely stops the machine when the water runs out.

Also, an indicator shows the battery level.

CONVENIENT TRANSPORT

When transporting the WT 15 the water hose is conveniently wound around the replaceable bottom and the coupler at the end placed in the designated slot.

TWO-SPEED PUMP

There is a higher capacity function of the pump built into the electronics. By pushing the switch 1.5-2 seconds the pump will work with double speed giving twice the amount of water. This function is particularly useful together with the Gardena spray nozzle to clean off the machine after work. This function can of course also be used if a cutting job requires extra water for some reason.

TECHNICAL SPECIFICATION	
Voltage	230 / 120 V
Water tank capacity	4 gal.
Weight, complete without water	8.6 lbs
Dimensions uncrated (LxWxH)	16.5x6.5x18.1 inch
Battery type	Lithium-Ion, 18V/1,6Ah
Battery capacity	2h at position I
Water pressure, position I	8.7 psi
Water pressure, position II	16 psi
Charger	18V/600mA
External power source	12-24V, min 2500mA
Hose, type and length	3/8" / 10mm, 3 m. / 10 ft.
