# Mix, Transport and Pour Directly Onto the Floor

# Mixing multiple batches is faster and easier with the new **MEGA HIPPO liner canister system.**

Mixing and placing of products is easier and faster. Cement screeds, grout, mortar, textured coatings, sealants, adhesives and other self-leveling compounds can be mixed guickly. The MEGA HIPPO boosts productivity, lowers labor costs and reduces physical effort.

The "Easy-roll Trolley" and the balanced "Easy-tilt Cradle" let you pour and spread material at the same time. Multi-stage pours to achieve a thicker screed are often not necessary. Wheel covers ensure that the casters remain free of screed splatter.

> Mix, transport and pour directly onto the floor up to 6 bags with one operator

PORTAMIX **PMH 80X-RL** 

THE HIP

#### **USE:**

PORTAOMIX

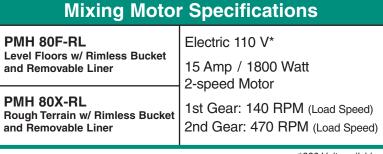

PORTAMIX

PMH 80F-RL

- Mix compounds, including cement screeds, overlay, underlay, textured coatings, sealants, adhesives, epoxies, resins, pre-tinted material and other self-leveling compounds
- Ideal for mixing in bulk and dispensing into small containers
- Consecutive batch mixing without downtime

#### FEATURES:

- High-torque, 15 Amp 2-geared motor
- Full-brim capacity of 23 gallons, 350 lbs. or 6-bag batches
- "Easy-roll Trolley" and balanced "Easy-tilt Cradle" allow for pouring and spreading of material at same time
- Specially shaped mixing bowl eliminates pockets of unmixed product and allows for easy cleaning
- 8-1/2" diameter paddles with helix ribbon and side bars lift and shear product quickly to produce excellent consistency and thorough mixing of colors and additives
- Resilient, pliable liner is easily cleaned; alternating liners prevents cross contamination
- Dust extraction port for vacuum connection

\*220 Volt available

Standard Equipment includes: mixing motor, bucket, removable liner and 2 paddles – TW225 for half batches (2-3 bags) and TW225D for full batches (5-6 bags)

# Key Features of the PORTAMIX MEGA HIPPO®

- Easy operation one person can mix, transport and pour
- · Accurately place material directly onto the floor
- Produces excellent mix consistency
- Ideal for mixing in bulk and dispensing into small containers
- · Pre-tinted material is easily blended

Bowl Capacity: 6 x 50 lbs. mix + water (23 gal./350 lbs.)  $6 \times 22 \text{ kg mix} + \text{water} (86 \text{ liters}/160 \text{ kg})$ 

Motor Mounting: Reversible for "alongside" mixing Tilting Cradle: Balanced for easy operation Weight: 109 lbs.

> Reverse motor mounting allows "alongside" mixing in smaller containers

# For Rugged Building Site Mixing and Pouring

# Save time and extend bucket life with a removable liner!

# Multiple Batch Mixing with Removable Liner

Mixing multiple batches is easier and faster with the new removable liner and rimless bucket system.

- Mix consecutive batches without downtime
- Resilient, pliable liner is easily cleaned
- Alternating liners prevents cross contamination
- Extends life of bucket

After mixing the first batch, the liner can be removed and cleaned. To speed up production, a second liner can be used while the first liner is being cleaned. The use of a liner also helps to prevent cross contamination and minimizes wear to the HIPPO bucket, extending its life.

### **Two Models Available:**

PORTAMIX PMH 80F-RL With Rimless Bucket and Removable Liner 4 Casters for Level Floor Use

Allows accurate placement – pour and spread at the same time.

PORTAMIX PMH 80X-RL With Rimless Bucket and Removable Liner 2 Tires for Rough Terrain Use

Increased height – pour directly into buckets or carts.

# The MEGA HIPPO portable mixing station is available with a pneumatic motor.

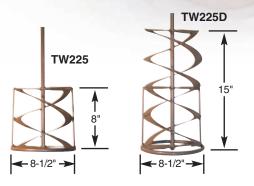

Two air-powered models are inherently safer for mixing paint, glue, epoxy, mortar, concrete, refractory cement and other materials in shipyards and the oil and gas industries.

They can be used around water with no fear of shock or blown circuitry.

PMH 80F-AIR PMH 80X-AIR

# The **PORTAMIX MEGA HIPPO®** is supplied with two mixing paddles:

- **TW225** for half batches (2-3 bags); 8-1/2" diameter x 27" long; ideal for plasters, concrete, mortars, resins and tile adhesives. 8" long helix and side bars.
- TW225D for full batches (5-6 bags); 8-1/2" diameter x 27" long; ideal for self-leveling compounds, screeds, paints, plasters and epoxy. 15" long helix and side bars.

The 8-1/2" wide helix and side bars lift and shear the product quickly and efficiently to produce an excellent mix consistency and thorough mixing of colors and additives. The paddle's large 8-1/2" diameter provides increased peripheral speed which eliminates the need for high-RPM mixing and helps to prevent flash curing.
