

MapeheatTM

Temperature Sensing Probe
Sensing Probe for Thermostat-
Controlled Radiant-Heated Floors

DESCRIPTION

Mapeheat Temperature Sensing Probe is designed for use with *Mapeheat Thermo Connect*, *Mapeheat Thermo Touch* and *Mapeheat Thermo Basic* thermostats. Use this replacement product if the probe that accompanies a *Mapeheat* thermostat is misplaced or if an additional probe is desired.

Note that the temperature-sensing probe must be installed before installation of the finished flooring.

INSTALLATION

To ensure full functionality of the floor-sensing thermostat, it is vital to install the probe before a mortar or self-leveler is applied on top. For instructions on installing the probe, see the *Mapeheat Cable*, *Mapeheat Mat* or *Mapeheat Mesh* Installation Handbook as well as the Quick Start Guide for the selected thermostat, all of which can be found inside product packaging and at www.mapei.com. Failure to install the probe will render thermostat's floor-sensing capabilities inoperable.

Product Specifications

Probe length	15 ft. (4.57 m)
Packaging	Plastic bag includes precision screwdriver for thermostat screw terminals
