

CT 48

Walk-behind Trowels gasoline-driven

**Trowels for high performance, quality finishes:
CT 48**

With a trowel diameter of 48-inches, the models of the CT 48 trowel range are ideal for finishing medium large areas. The trowels are optimally balanced, therefore they can be effortlessly controlled in the wide range of speeds. The transmission brake, electronic safety switch and engine speed sensor offer additional triple protection for the user. In an emergency situation the device will simply switch off and the handle will come to a stand-still after no more than a three-quarter turn. Furthermore, the unit will only start if the throttle lever is set to zero. This prevents an inadvertent rotation of the handle on start-up.

- Patented dynamically balanced trowels (when blades are turning) offer nearly effortless operation and maximum control at all speeds with all types of blades including float pans.
- Variable speeds: Low speeds for floating, high speeds for burnishing.
- A variety of engine options, horsepower and handle configurations provide versatility to meet individual preferences and job site conditions.
- Blade pitch up to 30° for better concrete burnishing.

The guide handles can be chosen individually for more user comfort.

Standard guide handle with adjustable handle and fixed center pole.

Height adjustable handle with Pro-Shift® System
enables continuous adjustment of the floating blade pitch as well as individual height adjustment.

Standard guide handle with adjustable handle and foldable center pole for easy transport

Different handles for ultimate ease of use:

	Handle adjustment	Pro-Shift® System	Height-adjustable	Fixed center pole	Folding center pole
Guide handle T	●			●	
Guide handle Fold-T	●				●
Guide handle ADJ-T	●		●	●	
Guide handle Fold ADJ-T	●		●		●
Guide handle ADJ-P		●	●		
Guide handle Fold ADJ-P		●	●		●

All of these handle versions are available for all models of walk-behind trowels.
