

GRABO® PRO BRUSHLESS HEAVY LIFTING MADE EASY

Specifications:

Electric vacuum lifting device

Dimensions	310x191x149 mm / 12.2x7.5x5.9 inches
Net weight (with battery)	2 kg / 4.4 lbs

NOTICE: GRABO® Pro Brushless was tested up to 530 lbs (240 kg) at maximum lifting force under ideal conditions. However, this figure is the breaking point under optimal lab testing conditions which must never be reached in real-world applications!

Local regulations require different safety margins to be used and the official tool Working Load Limit (WLL) is set to 375 lbs (170 kg) based on a 3:2 ratio on a non-porous surface. In no case should the GRABO® Pro Brushless be used to lift more than the stated safe lifting values. Use the chart below to estimate safe lifting values:
