

BLANKE ECKBERT KASKA

BLANKE ECKBERT XL KASKA

Note:
Laser cut patterns allow water to escape, making the shelf easy to clean and maintain.

NEW BLANKE ECKBERT

BLANKE ECKBERT is a useful corner shelf for your modern shower where shampoo and shower gel find their place. The corner shelf is made of sturdy stainless steel and is available in different geometries and provides tidiness in the shower, for example. Different structures and designs are cut out in the shelf surface to prevent standing water and makes the tray easier to clean and maintain. The shelf can be inserted subsequently into the groove without requiring any drilling.
